Honey festival - Annual event facilitated by SERAW

This **Knowledge Product** was provided by **State Enterprise Radioactive Waste (SERAW)** as a contribution to the **Nuclear Decommissioning Knowledge Management (NDKM) Initiative**. It was crafted as an online mini-site which details an annual honey festival held by the organisation.

The mini-site presents the experience of SERAW in **communicating with stakeholders** and in seeking **public trust** for the activities that the enterprise implements in terms of **decommissioning** and **management** of **radioactive waste (RAW)** in Bulgaria.
