

# LEARNING LAB

## 1<sup>st</sup> General Training Course on Education Impact Evaluation

The **European Commission** is pleased to invite you to the **first Learning Lab's training course and exchange of practices** on education policy evaluation.

**Objective:** This training course will offer an in-depth overview of good practices on evaluating the impacts of education policies. The focus is on how to use causal methodologies to inform the evaluation process, from the design to the choice of data, the analysis, and the interpretation of results.

### Programme:

- Feb 6, 2023, 9:30-13:00 CET:**
- Introduction to impact policy evaluation
  - Randomized experiments
  - Matching on observable characteristics
  - Importance of accessing high quality data
- Feb 7, 2023, 9:30-13:00 CET:**
- Difference-in-Differences
  - Regression discontinuity design
  - Terms of reference

**Where:** Online – Links to the web events will be shared after registration.

**How:** This general training will demonstrate theoretical underpinnings and empirical aspects of education policy evaluation providing insights on different evaluation methods. Each presentation illustrates examples of European education policy evaluations to show the practical implementation of evaluation. Presentations use interactive learning techniques and provide time for Q&A sessions.

Presentations will be given by *Sylke Schnepf*, *Silvia Granato*, *Manuel Serrano-Alarcón*, and *Josep Amer-Mestre* from the **Competence Centre on Microeconomic Evaluation** ([CC-ME](#)) of the Joint Research Centre.

You can **register** for participation in the training [here](#).
