

## Waste Fishing Gear: Serious Game

3<sup>rd</sup> March 2020

10.00 – 2.00

DG MARE, European Commission

Rue Joseph II 99

Brussels

### Questionnaire

Thank you very much for attending the event. To help the organisation of future events would you please complete this questionnaire.

1. How effectively was this event organised? (Please rate on a scale of 1-10)

1      2      3      4      5      6      7      8      9      10  
Irrelevant      Excellent

2. To what extent did this event meet your expectations? (Please rate on a scale of 1-10)

1      2      3      4      5      6      7      8      9      10  
Irrelevant      Excellent

3. How would you rate the Waste Fishing Gear: Serious Game workshop? (Please rate on a scale of 1-10)

1      2      3      4      5      6      7      8      9      10  
Irrelevant      Excellent

4. What were the key benefits that you achieved as a result of attending the Waste Fishing Gear: Serious Game workshop?

Interesting discussions with group members.

5. How could we improve this Waste Fishing Gear: Serious Game workshop?

The focus on waste fishing gear is quite narrow: it needs to be seen in the broader context of implementation of the SUP and PRF Directives. As was seen in the exercise it was difficult to stay focused only on waste fishing gear. It also seemed that the issue of passively fished waste was more or less missing from the game outline.

6. What is your interest in Sustainability in the Waste Fishing Gear?

The sustainability issue of waste fishing gear is linked with the broader context of the objectives of the SUP and PRF Directives plus the circular economy action plan. It is important that the wider context is explained well to all relevant stakeholders, including in particular the fishermen.
